DOCUMENT ROUTING

ADAPTIVELY CONFIGURE THE WAY YOUR TRADING PARTNERS RECEIVE DOCUMENTS

B2BE's document routing solution means you empower your organisation to be more responsive in the management of how your trading partners receive their documents. Easy to configure online interfaces. Configure the way your organisation's clients receive invoices or statements, for example in a matter of seconds.

SOLUTION OVERVIEW

The B2BE document routing solution is a hosted application available through the web portal. It allows your organisation to send automated data feeds to B2BE who will then cross reference by client or supplier number the way the data is to be sent; EDI, email, facsimile or print and post.

You can default all client invoices, for example to be sent via post and progressively change the configurations so the invoices are sent via more cost-effective means such as EDI and email.

You're able to setup multiple routing channels so documents can go via multiple methodologies, print and email, for example. You can setup multiple recipients via email so you can carbon copy and blind carbon copy.

The permutations are endless so your organisation is empowered to be able to respond quickly to a client's requirements which includes full audit and control and visibility through online interfaces accessed via the B2BE web portal environment.

RELATED PRODUCTS

B2BE's document routing solutions utilise several B2BE products to create a fully automated document distribution solution which is combined with the online document routing application. B2BE's document routing solutions can utilise all, or in part, any of the following products to create the exact solution your organisation needs to manage your outbound documents.

EDI

Do you need to respond to customer's EDI requirement to trade electronically? Do you want to embark on an electronic EDI based on-boarding solution to trade with your suppliers? B2BE has all your bases covered with B2BE's EDI solution.

Email

B2BE's email gateway allows your organisation to send automated data to B2BE for automated formatting and on-sending via email.

Facsimile

B2BE's fax gateway allows your organisation to send automated data to B2BE for automated formatting and on-sending via fax.

Print management

B2BE's print management product allows your organisation to send data to B2BE for automated formatting, collation, printing and transmission via post.
